HA-001	OM03 - Normal Driving	OS03 - Country Road	EN01 - Normal conditions	SD02 - High speed	N/A	IU02 - Incorrectly used	Normal driving on country roads during normal conditions with high speed.
HA-002	OM03 - Normal Driving	OS03 - Country Road	EN01 - Normal conditions	SD02 - High speed	N/A	IU02 - Incorrectly used	Normal driving on country roads during normal conditions with high speed.
HA-003	OM03 - Normal Driving	OS03 - Country Road	EN01 - Normal conditions	SD02 - High speed	N/A	IU01 - Correctly used	Normal driving on country roads during normal conditions with high speed.
HA-004	OM04 - Backward Driving	OS02 - City Road	EN01 - Normal conditions	SD01 - Low speed	N/A	IU03 - N/A	Backwards driving on city roads during normal driving conditions with low speed.

Hazard Identification						
Hazard ID	**Function**	**Deviation**	**Deviation Details**	**Hazardous Event (resulting effect)**	**Event Details**	**Hazardous Event Description**
HA-001	Lane Departure Warning (LDW) function shall apply an oscillating steering torque to provide the driver with haptic feedback.	DV04 - Actor effect is too much	The LDW function applies an oscillating torque with very high torque (above limit)	EV00 - Collision with other vehicle	High haptic feedback can affect driver's ability to steer as intended. The driver could lose control of the vehicle and collide with another vehicle or road infrastructure.	The LDW function applies too high an oscillating torque to the steering wheel (above limit).
HA-002	Lane Keeping Assistance (LKA) function shall apply the steering torque when active in order to stay in ego lane.	DV03 - Function always activated	The driver is misusing the system by exploiting the LKA function as a fully autonomous function.	EV00 - Collision with other vehicle	The driver takes both hands off the wheel indefinitely and cannot react to other vehicles on the road that are merging or turning into the current lane, causing a collision.	The LKA function has no time limit so the driver misinterprets and misuses the function to be fully autonomous.
HA-003	Lane Keeping Assistance (LKA) function shall apply the steering torque when active in order to stay in ego lane.	DV03 - Function always activated	The LKA function does not deactivate when the driver regains control of the steering wheel.	EV00 - Collision with other vehicle	Changing lanes may cause the vehicle to unexpectedly jerk in an attempt to perform the LKA function and collide with another vehicle or road infrastructure.	The LKA function never deactivates when the driver regains control of the steering wheel and therefore continues to operate in an improper state.
HA-004	Lane Keeping Assistance (LKA) function shall apply the steering torque when active in order to stay in ego lane.	DV19 - Sensor detection is wrong	The LKA function detects the sidewalk as the current lane when backing out of a parking space that backs up to a city road.	EV02 - Collision with pedestrian	The LKA function takes over control of the vehicle unexpectedly from the driver's perspective and corrects the vehicle to the sidewalk (the current lane), bumping into a pedestrian at low speed.	The LKA function actuates as expected but identifies and corrects to the wrong lane due to inaccurate sensor data.

Hazard ID	Hazardous Event Classification					
ID	Exposure (of situation)	Rationale (for exposure)	Severity (of potential harm)	Rationale (for severity)	Controllability (of hazardous event)	Rationale (for controllability)
HA-001	E2 - Low probability	Driver does not live near country roads. Limited country road driving.	S3 - Life-threatening or fatal injuries	Driver is travelling at high speed.	C3 - Difficult to control or uncontrollable	Driver cannot control vehicle while LKA function is operating.
HA-002	E2 - Low probability	Driver does not live near country roads. Limited country road driving.	S3 - Life-threatening or fatal injuries	Driver is travelling at high speed.	C3 - Difficult to control or uncontrollable	Driver cannot control vehicle while LKA function is operating.
HA-003	E2 - Low probability	Driver does not live near country roads. Limited country road driving.	S3 - Life-threatening or fatal injuries	Driver is travelling at high speed.	C3 - Difficult to control or uncontrollable	Driver cannot control vehicle while LKA function is operating.
HA-004	E2 - Low probability	Situation dependent on uncommon parking lot design.	S1 - Light and moderate injuries	Dependent on pedestrian response.	C3 - Difficult to control or uncontrollable	Driver cannot control vehicle while LKA function is operating.

Hazard ID	Determination of ASIL and Safety Goals	
ID	ASIL Determination	Safety Goal
HA-001	ASIL B	The LKA function shall end after a given time interval to prevent over applying torque.
HA-002	ASIL B	The LKA function shall be time limited so that the driver cannot misuse the system for autonomous driving.
HA-003	ASIL B	The LKA function shall be time limited and the additional steering torque shall end after a given time interval so that the system cannot maintain an improper state.
HA-004	QM	Sensors shall maintain a high quality of readings.

Risk Assessment Definitions

Exposure

ID	Description	Duration (of situation)	Frequency (of situation)	Reference
E0	Incredible			E0 - Incredible
E1	Very low probability	Not specified	Occurs less often than once a year for the great majority of drivers	E1 - Very low probability
E2	Low probability	<1 % of average operating time	Occurs a few times a year for the great majority of drivers	E2 - Low probability
E3	Medium probability	1 % to 10 % of average operating time	Occurs once a month or more often for an average driver	E3 - Medium probability
E4	High probability	>10 % of average operating time	Occurs during almost every drive on average	E4 - High probability

Severity

ID	Description	Remarks	Probability of Injuries	Reference
S0	No injuries	No injuries	AIS 0 and less than 10 % probability of AIS 1-6	S0 - No injuries
S1	Light and moderate injuries	Light and moderate injuries	More than 10 % probability of AIS 1-6 (and not S2 or S3)	S1 - Light and moderate injuries
S2	Severe and life-threatening injuries	Severe and life-threatening injuries (survival probable)	More than 10 % probability of AIS 3-6 (and not S3)	S2 - Severe and life-threatening injuries
S3	Life-threatening or fatal injuries	Life-threatening injuries (survival uncertain), fatal injuries	More than 10 % probability of AIS 5-6	S3 - Life-threatening or fatal injuries

Controllability

ID	Description	Remarks		Reference
C0	Controllable in general	Controllable in general		C0 - Controllable in general
C1	Simply controllable	99 % or more of all drivers or other traffic participants are usually able to avoid harm		C1 - Simply controllable
C2	Normally controllable	90 % or more of all drivers or other traffic participants are usually able to avoid harm		C2 - Normally controllable
C3	Difficult to control or uncontrollable	Less than 90 % of all drivers or other traffic participants are usually able, or barely able, to avoid harm		C3 - Difficult to control or uncontrollable
